

## **Activities:**

Approved by the decision of  
Extraordinary general meeting of members of  
The Inter-regional Union of Designers», noncommercial partnership  
(Protocol № 6/Н 18.06.2010)

List of types of work on preparation of project documentation, which affect the safety of capital construction.

(Approved by the order of Ministry of Regional Development of the Russian Federation on December 30, 2009 № 624 with the changes introduced by the Ministry of Regional Development of the Russian Federation on 23.06.2010g № 294)

1. Preparation of the scheme planning organization of land
  - 1.1. Works on preparation of the master plan of the parcel of land
  - 1.2. Works on preparation of the scheme of the planirovochny organization of the route of linear object
  - 1.3. Works on preparation of the scheme of the planirovochny organization of a strip of branch of a linear construction
2. Architectural solutions preparation
3. Design solutions preparation
4. Works on preparation of data on the internal engineering equipment, internal networks of technical providing, about the list of technical actions:
  - 4.1. Works on preparation of projects of internal engineering systems of heating, ventilation, conditioning, antismoky ventilation, heat supply and holodosnabzheniye
  - 4.2. Works on preparation of projects of internal engineering water supply systems and sewerage
  - 4.3. Works on preparation of projects of internal systems of power supply\*
  - 4.4. Works on preparation of projects of internal low-current systems \*
  - 4.5. Works on preparation of projects internal schedulings, automation and management of engineering systems
  - 4.6. Works on preparation of projects of internal gas supply systems
5. Works on preparation of data on external networks of technical providing, about the list of technical actions:
  - 5.1. Works on preparation of projects of external networks of a heat supply and their constructions
  - 5.2. Works on preparation of projects of external networks of water supply and sewerage and their constructions
  - 5.3. Works on preparation of projects of external networks of power supply to 35 kV inclusive and their constructions
  - 5.4. Works on preparation of projects of external networks of power supply no more than 110 kV inclusive and their constructions

- 5.5. Works on preparation of projects of external networks power supply of 110 kV and more and their constructions
- 5.6. Works on preparation of projects of external networks of low-current systems
- 5.7. Works on preparation of projects of external networks of gas supply and their constructions
6. Works on preparation of technological decisions:
  - 6.1. Works on preparation of technological solutions of residential buildings and their complexes
  - 6.2. Works on preparation of technological solutions of public buildings and constructions and their complexes
  - 6.3. Works on preparation of technological solutions of process buildings and constructions and their complexes
  - 6.4. Works on preparation of technological solutions of objects of transport appointment and their complexes
  - 6.5. Preparation of hydraulic structures and their complexes technological solutions
  - 6.6. Works on preparation of technological solutions of objects of agricultural purpose and their complexes
  - 6.7. Works on preparation of technological solutions of objects of a special purpose and their complexes
  - 6.8. Works on preparation of technological solutions of objects of oil and gas appointment and their complexes
  - 6.9. Works on preparation of technological solutions of objects of collection, handling, storage, conversion and waste recycling and their complexes
  - 6.12. Works on preparation of technological solutions of objects of treatment facilities and their complexes
  - 6.13. Works on preparation of technological solutions of objects of the underground and their complexes
7. Works on development of special sections of the project documentation:
  - 7.1. Technical actions for civil defense
  - 7.2. Technical actions for the prevention of emergency situations of natural and technogenic nature
  - 7.3. Declaration development on industrial safety of dangerous production objects
  - 7.4. Development of the declaration of safety of hydraulic engineering constructions
  - 7.5. Development of reasons for radiating and nuclear protection
8. Works on preparation of projects of the organization of construction, demolition and dismantle of buildings and constructions, to useful life and preservation prolongation \*
9. Works on preparation of projects of actions on environmental protection
10. Works on preparation of projects of actions on ensuring fire safety
11. Works on preparation of projects of actions on ensuring access of low-mobile national groups
12. Works on inspection of construction designs of buildings and constructions
13. Works on the organization of preparation of the project documentation, the involved builder or the customer based on the agreement the legal entity or the individual entrepreneur (the general designer).

---

\* These types and groups of work types require receipt of the certificate on the admission on the work types, objects of capital construction influencing safety in case of accomplishment of such

works on the objects specified in article 48.1 of the Town-planning code of the Russian Federation.
